

RAFAEL GEROTTO COELHO

Fullstack developer | Frontend | Backend |
Javascript | ReactJs | Bachelor in Graphic Design

Fullstack Developer with 2 years of experience in frontend and backend development, specializing in React, Node.js, and TypeScript. Proficient in modern web technologies, including HTML, CSS, JavaScript, Angular, PHP, Next.js, Express.js, MongoDB, MariaDB, MySQL, Git, and Docker. Successfully developed and deployed a fully automated motorcycle rental system, optimizing the booking process and improving operational efficiency. Passionate about problem-solving, clean code, and scalable architecture, with a strong commitment to continuous learning and adopting emerging technologies. Seeking a Frontend Developer position at Dominion Digital to contribute with technical expertise and drive innovation in digital transformation projects.

WORK EXPERIENCE

Fullstack Developer - Moto2Go - Sitges - Internship

Jul-2024 - Dec-2024

- Collaborate with the development team to enhance and maintain the company's website.
- Built a website from scratch for a motorcycle rental company using React.js, creating a dynamic and user-friendly interface focused on optimal user experience.
- Implement mongoose for efficient database management and data handling.
- Developed an admin dashboard to manage reservations, allowing real-time tracking of upcoming, active, and completed bookings, improving date management.
- The system helped the company streamline operations and reduce booking management time, enhancing overall efficiency.
